# WELSH BACCALAUREATE QUALIFICATION

## What is the Welsh Baccalaureate?

The Welsh Baccalaureate is based on a Skills Challenge Certificate alongside Supporting Qualifications. The requirements of both the Skills Challenge Certificate and Supporting Qualifications must be met in order to achieve the overarching Welsh Baccalaureate.

The focus of the Skills Challenge Certificate will be on the essential and employability skills young people need in their future lives and these skills will be developed and assessed through an Individual Project and three Challenges. The seven essential employability skills are:

- Literacy
- Numeracy
- Digital Literacy
- Critical Thinking and Problem Solving
- Planning and Organisation
- Creativity and Innovation
- Personal Effectiveness

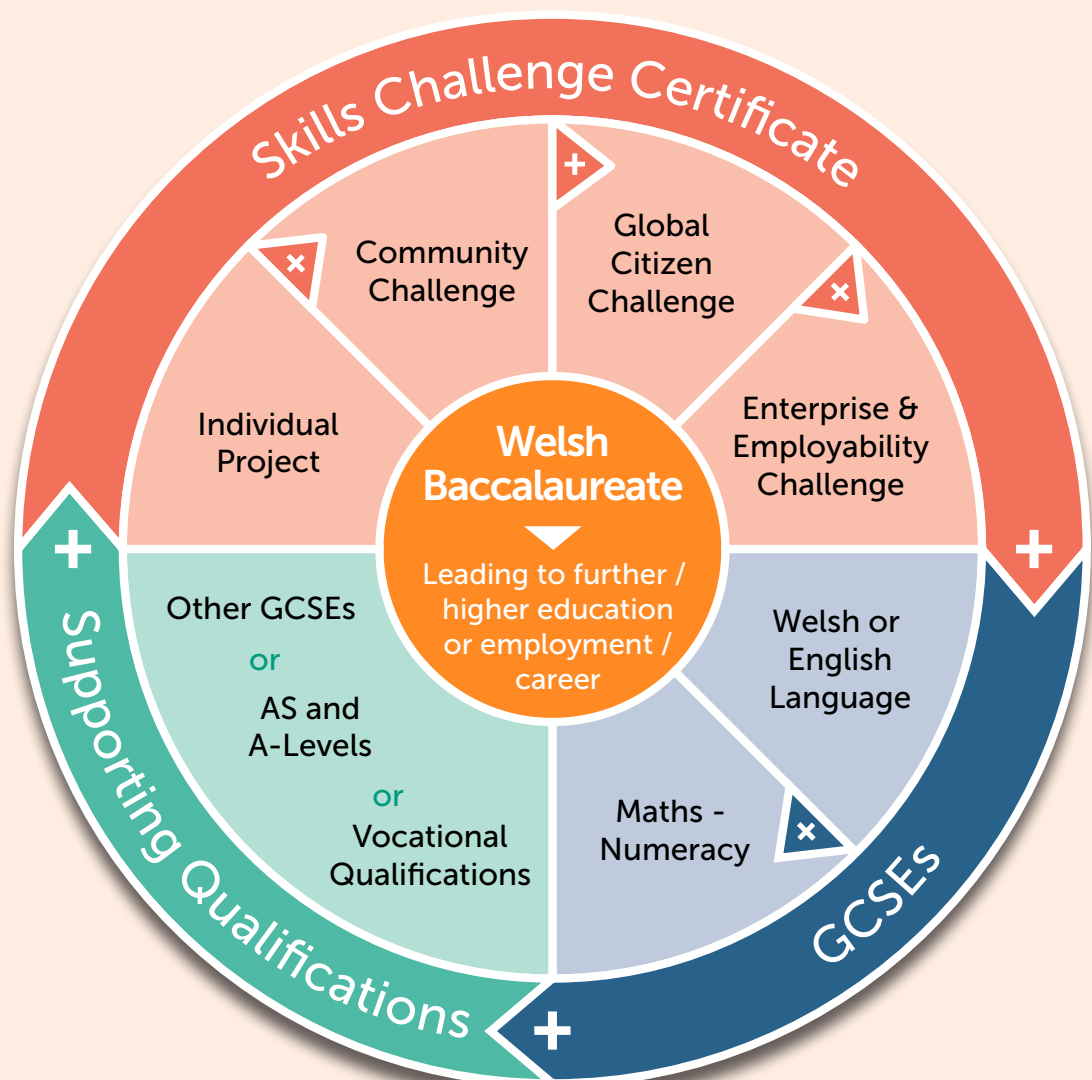

To meet the National Welsh Baccalaureate requirements all five of the Supporting Qualifications must be achieved at grades A\*-C. Similarly, for the Foundation Welsh Baccalaureate the Supporting Qualifications must be achieved at grades A\*-G.

The Skills Challenge Certificate consists of four components which are followed by all learners:

- Individual Project – 50%
- Enterprise and Employability Challenge – 20%
- Global Citizenship Challenge – 15%
- Community Challenge – 15%

All components are internally assessed and externally moderated

The Supporting Qualifications include two mandatory GCSEs of Welsh Language or English Language together with Mathematics-Numeracy. A further three GCSEs are also required, of which two may be of equivalent qualifications.
